Our Certificates

About Us

With many years of family experience in apricot farming, we established **Yiğitler Gıda** in 2015 in Malatya, turning this heritage into a producer-manufacturer company. Since then, we have grown into a trusted producer and manufacturer, combining traditional expertise with modern technology.

We process both the apricots we cultivate ourselves and those we source directly from carefully selected and trusted local growers. In our modern facility in the heart of the world's apricot production, Malatya, the apricots are carefully washed, sorted, and graded with precision before being packed in a wide variety of formats, from 150 g retail packs to 12.5 kg cartons. With strict quality control at every stage, our products are exported to many destinations worldwide, especially across Europe as our main market.

In 2023, we expanded our operations to Aydın, a region famous for its rich harvests. Here, we process and package regional specialties—especially dried figs and Sultana raisins—bringing the authentic taste of Türkiye to global markets.

At Yiğitler Gıda, we build our business on **trust, mutual benefit, and long-term cooperation**. Guided by our principle *“Quality products, fair prices, and sustainable partnerships”*, we look forward to creating lasting value together with our customers around the world.

Yiğitler Gıda — Where tradition meets quality and reaches the world.
